Contents

1	PREFACE	2
2	SHOPPING LIST	4
2.1	WIND CHIMES	4
2.2	ENDER 3	4
3	BUILD GUIDE	5
3.1	STEP 1	5
3.2	STEP 2	5
4	FAQ/TROUBLESHOOTING	6

2 SHOPPING LIST

Ensure you describe as many relevant specs for each to make it easier to find replacements or get the parts locally. Don't just write "spring", instead take a couple minutes to measure wire diameter, spring length, outside diameter and so on. Each part should also have a link to a place that sells the part

2.1 WIND CHIMES

Nothing makes for a sweeter evening than some windchimes! buy them at the windchime site <https://maf-arms.com/product/ar15-fire-control-wind-chime/>

2.2 ENDER 3

You need a 3d printer to print things in 3d Sources: <https://ctrlpew.com/getting-started-2-now-what/>

3 BUILD GUIDE

How to put things together. Make sure that you include plenty of pictures and detailed descriptions of each step. New 3d gunners will be trying to follow your guide, you should make it easy for them. It's better for you to include a picture too much than one too little

3.1 STEP 1

take things

3.2 STEP 2

put thing on other thing

4 FAQ/TROUBLESHOOTING

Found out anything interesting during development? Put it here so people won't have to spam the same questions over and over in the chatrooms.

Q: What is a FAQ?

A: FAQ stands for frequently asked questions.
